WORK EXPERIENCE

Front End Developer
The Blacklight Group LLC

📅 July 2024 - current

- Collaborated in the development of cross-platform iOS and Android mobile applications using React Native.
- Developed accessible and responsive user interfaces, ensuring consistent experiences across devices using HTML, CSS, and Javascript.
- Participated in weekly standup to celebrate team successes, address weaknesses, and assign tasks.
- Worked within agile scrum methodologies to coordinate efforts across a multi-disciplinary team.
- Used a Component-Based Architecture to develop user interfaces that is broken down into reusable, independent components, allowing for modular development and easier management of complex UIs.

PROJECTS

Board (Virtual Bulletin Board)
Full Stack

- Developed a full-stack application using HTML, CSS, JavaScript, and Node.js using a single language for both sides, enabling faster development and improved code reuse.
- Used a MVC design pattern with such libraries as Sequelize for the models, Handlebars for the views, and the Express framework for Node.js to create the controllers.
- Participated in code reviews in GitHub to ensure code quality, adherence to best practices, and knowledge sharing among team members.
- Collaborated with cross-functional teams to gather requirements, troubleshoot issues, and ensure alignment with project goals.
- Local development white box testing prior to deployment of software application to Heroku, with post deployment smoke testing.

Dorpamine
Mobile Application Front End Developer

📅 July 2024 - current

- Collaborated with Backend team on API development using Swagger documentation and the OpenAPI framework.
- Integrated reusable components, achieving a cohesive brand identity and increased performance reliability.
- Built cross-platform mobile features with React Native, enhancing user experience across Android, iOS, and web platforms.
- Used version control systems (Git) to manage source code changes and collaborated with team members on code merges and conflict resolution.
- Utilized frameworks such as React Native to build scalable, maintainable applications, using a shared code base for iOS and Android development to create reliability.
- Collaborated with a team using Agile methodologies such as Kanban and Scrum. The team consisted of a Project Manager, Front End and Back End Developers in consistent stand ups to ensure that the team maintained open communication concerning current progress and new assignments.

CAREER OBJECTIVE

Motivated and detail-oriented software engineer with a strong foundation in programming, problem-solving, and software development principles. Passionate about learning new technologies, collaborating in team environments, and building user-centered applications. Seeking an opportunity to grow within a collaborative, product-focused development team that values creativity, technical excellence, and professional development.
